

CZECHDESIGN

INTERNSHIP WITHIN THE DESIGN ORGANISATION IN PRAGUE

Are you a foreigner looking for a foreign internship within the design organisation in one of the world's most beautiful cities?

CZECHDESIGN is a non-governmental organization supporting and presenting design. The civic association was founded in 2003 by students, volunteers and design fans who shared enthusiasm to spread information about Czech design production to the public. The main goal of the association is quality design support and its propagation. CZECHDESIGN tries to advance ideas of "equal design". (Design that considers the needs of a broad group of people: regarding their age, physic proportions, capabilities or disabilities.) CZECHDESIGN operates the oldest Czech design portal and runs the Gallery/CZD situated in the city center of Prague where exhibitions, lectures, informal meetings and workshops take place. Last but not least the cooperation between designers and producers plays a significant role in the association's activities. (It brings a positive impact on the design quality of products.)

This is an unpaid position. You will be participating in various projects and gain experience in event organization and production, promotion and photography.

We are looking for a student who has some experience with photography, graphics programs and who could work approximately 4 days a week. If you are open-minded, easy-going and keen to learn and create, we would like you to join our team.

The length of the internship should be at least 3 months. If you are interested in working for our organization, send us your CV and motivation letter.
